

Tushar Choudhary

About Me

I'm a nineteen year old teenager who still has the curiosity of a child. Obsessed with stars and amused by the mysterious universe. Capturing the world through my camera is my hobby, and I believe that solution lies in one's perspective. I'm dreamer with clarity in my thoughts and firmness in decisions. I'm intrigued by technology and have thirst for challenges. I have the courage to innovate and march beyond failures. I'm a leader with confident speech and bold opinions. I'm a sportsman and I work like I play, focused with passion and persistence. I have a kind heart and take honor in serving the needy. But mostly a student who asks too many questions!
